ACKNOWLEDGMENTS

This report was completed in the Economic Censuses and Surveys Division of the Bureau of the Census under the supervision of **Thomas A. Thompson,** who directed the compilation, tabulation, and final presentation of the data. **Johnny W. Monaco** and **Mary E. King** contributed significantly in the development of the data in part 1, as did **Carol E. Lutz** in the editing and analysis of the data in part 2. **Debbie S. Barrett** and **Mildred D. Smith** handled the posting of the tables, with assistance from **Doris H. Osborne. David Eade, Steven K. Martin, Haydn R. Mearkle,** and **C. Harvey Monk, Jr.** assisted in developing the data in part 1, and **Stephan Potemkin** of Industry Division provided technical guidance in the development of the data in part 2. **David E. Henderson,** who has since left the Bureau, was responsible for all publication planning, including preliminary table plans and computer specifications and procedures to be used in developing the data. General staff guidance was provided by **Roger Bugenhagen,** Assistant Chief of the division.

Computer programing was under the supervision of **Andrew L. Grieco,** Assistant Chief of the division. **Herbert S. Isham** had primary responsibility for the overall design of the computer systems used to generate the data, and **Chuck F. Lee** was responsible for much of the actual programing.

Introduction

This report on mergers and acquisitions is divided into two parts. Part 1 covers large multi-unit companies (i.e. companies with 2,500 or more employees and more than one establishment) which were within the scope of the 1967 Economic Censuses and which acquired other companies in whole or in part during the period 1968 to 1971. Part 2 covers ownership changes of large manufacturing establishments (i.e. establishments with 250 or more employees) during each of the years 1968, 1969, and 1970. The statistical information contained in this report represents only partial coverage of total domestic merger and acquisition activity during the years in question.

For summaries of the findings of this report, see the texts preceding the statistical tables in part 1 and part 2. For technical information concerning the sources and limitations of the data presented in this report, see appendix A. For a glossary of technical expressions, see appendix D.

PART 1

Acquisitions by Large Multi-Unit Companies: 1967-1971

Acquisitions by Large Multi-Unit Companies: 1967 to 1971

According to the data presented in tables 1-5 of this section, merger and acquisition activity involving large companies during the 1968-71 period was dominated by manufacturing companies. Five hundred and sixty-five of 702 acquiring companies, making up 66 percent of acquiring company establishments and 79 percent of acquiring company employment, were classified in manufacturing. These companies accounted for 78 percent of acquired whole-company employment and 92 percent of partial acquisition employment. On the whole they accounted for 77 percent of all acquired establishments and 80 percent of all acquired employment. These results are closer to those for whole-company acquisitions than to those for partial acquisitions because the former accounted for 90 percent of all acquired establishments and 87 percent of all acquired employment.

Manufacturing was also the most important activity among acquisitions in terms of employment. On the whole, manufacturing establishments made up 24 percent and retail trade establishments 40 percent of all acquired establishments. However, since the acquired manufacturing establishments were larger on the average, 230.1 employees vs. 38.7, they accounted for 60 percent of all acquired employment, with the retail trade establishments accounting for 17 percent.

Retail trade and manufacturing were the only industry divisions in which acquired establishments classified in the same division accounted for a majority of acquired employment. On an employment basis, acquiring companies in manufacturing made 70 percent of their acquisitions among manufacturing establishments, and retail trade acquiring companies made 72 percent of their acquisitions among retail trade establishments. In two other divisions, mineral industries and selected services, same-division establishments accounted for a plurality of acquired employment.

In terms of employment, only 10.5 percent of all acquired establishments were acquired by companies classified in the same enterprise industry category, and only another 22.6 percent went to companies in other categories having at least one establishment in the same category. By contrast, 55.8 percent of all acquired establishments were acquired by companies having no existing establishments in the same category. Considering only establishments of whole-company acquisitions, 9.9 percent went to companies in the same category and 21.8 percent to companies with at least one establishment in the same category, while 57.4 percent went to companies with no establishments in the same category. Establishments of partial acquisitions were more closely related to those of their acquiring companies, however, as the corresponding figures for partial acquisitions were 14.6 percent, 27.8 percent, and 45.3 percent.

Acquired whole companies classified in the same 3-digit industry category as their acquiring companies accounted for only 11.8 percent of acquired whole-company employment, with acquired companies not classified in the same category, but in the same 2-digit major group, accounting for another 9.1 percent. However, 79.1 percent of acquired whole-company employment consisted of acquired companies classified in major groups other than those of their acquiring companies. In the case of partial acquisitions, acquired establishments classified in the same 3-digit category as their acquiring companies again accounted for 14.6 percent of acquired employment, while establishments in other categories within the same 2-digit major group made up 13.2 percent and establishments in other major groups 65.5 percent of the partial acquisition total.

Of the 702 large companies making acquisitions during the 1968-71 period, the number having 5,000 or more employees increased from 459 in 1967 to 521 in 1971. While at least 31 of the 702 companies had fewer employees in 1971 than in 1967, the increase of 62 in the number having at least 5,000 employees was spread over all size classes in the 5,000-or-more-employees range. The number of acquired establishments and the number of acquired employees per acquiring company both tended to be greater for larger companies than for smaller. For all acquiring companies, the average number of acquired establishments was 25.8 and the average number of acquired employees was 2,336.7, while the overall average number of employees per acquired establishment was 90.5.

PART 2

Acquired Large Manufacturing Establishments: 1968, 1969, 1970

Acquired Large Manufacturing Establishments: 1968, 1969, and 1970

According to the data presented in tables 1-4 of this section, acquisition of large manufacturing establishments was greater in 1969 than in either 1968 or 1970. Eight hundred and seventy-eight large establishments were acquired in 1969, compared to 630 in 1968 and 535 in 1970. Employment, payroll, shipments, and value added of acquired establishments were also greater in 1969 than in either of the other 2 years. It is difficult to say, however, whether 1968 or 1970 was the second most important year of the three in terms of acquisitions. While the number of establishments acquired and employment were higher in 1968, payroll, shipments, and value added were greater in 1970. Although only 85 percent as many establishments were acquired in 1970 as in 1968, the 1970 acquisitions accounted for approximately the same percentage of total employment, payroll, shipments, and value added in that year as did the 1968 acquisitions in 1968.

Table A indicates the numbers and percentages of manufacturing industries in which acquisitions accounted for relatively large percentages of the industry's total shipments. Two sets of industries are examined, Set 1 comprising those industries in which the shipments of acquired establishments accounted for between 10 and 20 percent of the shipments of all large establishments, and Set 2 comprising industries in which such shipments accounted for more than 20 percent.

Table A

Year	Set 1		Set 2	
	Number of industries	Percent of manufacturing industries	Number of industries	Percent of manufacturing industries
1968...........	41	9.7	15	3.6
1969...........	62	14.5	20	5.0
1970...........	21	5.0	19	4.5

Table B shows that the industries in which acquisitions played a relatively large role were, on the average, less important in terms of value added than were other industries.

Out of a total of 422 4-digit manufacturing industries there were 37 in which acquired establishments accounted for more than 10 percent of shipments in more than 1 year. In five of these industries acquired establishments' shipments were more than 10 percent in all 3 years, while in three industries acquired establishments accounted for more than 20 percent of shipments in each of 2 years.

These 37 industries, comprising 8.9 percent of all manufacturing industries, were responsible for 6.5 percent of the total value added in manufacturing in 1968, 6.6 percent in 1969, and 6.7 percent in 1970. But the acquired establishments in these industries accounted for 22.6 percent, 17.8 percent, and 10.7 percent, respectively, of the value added of all acquired establishments in these years.

Table B

Year	Set 1		Set 2	
	Percent of manufacturing industries	Percent of manufacturing industries' value added	Percent of manufacturing industries	Percent of manufacturing industries' value added
1968...........	9.7	8.4	3.6	1.3
1969...........	14.5	12.4	5.0	2.0
1970...........	5.0	3.2	4.5	1.5

Out of a total of 148 3-digit industry groups in manufacturing, in 1968 and again in 1970 there were 20 groups in which 9 or more large establishments were acquired, while in 1969 there were 35 such industry groups. In 16 of the 3-digit groups 9 or more establishments were acquired in each of the 3 years, while in 5 groups 9 or more establishments were acquired in each of 2 years.

The percentage of all acquired establishments acquired by companies having at least one other establishment in the same 4-digit industry was nearly the same in all 3 years, ranging from 30.6 percent to 33.1 percent, as shown in Table C.

Table C

Year	Percent of acquired establishments acquired by--		
	Companies having at least one establishment in same industry	Manufacturing companies having no establishments in same industry	Companies having no establishments in manufacturing
1968...............	30.6	52.4	17.0
1969...............	33.1	49.9	17.0
1970...............	33.1	42.2	24.7

Between 1968 and 1970 there was an apparent trend toward acquisition of manufacturing establishments by non-manufacturing companies and away from acquisitions by manufacturing companies having no establishments in the same industry.

Shipments data show the same trend, as illustrated in Table D. There was also an upward trend in the percentage of acquired establishments' shipments accounted for by the acquisitions of companies with at least one establishment in the same industry.

Table D

Year	Percent of acquired establishments' shipments accounted for by acquired establishments of--		
	Companies having at least one establishment in same industry	Manufacturing companies having no establishments in same industry	Companies having no establishments in manufacturing
1968	31.4	56.6	12.0
1969	33.9	50.8	15.4
1970	43.3	37.8	18.9

In Table E establishments acquired by manufacturing companies having no establishments in the same industry as that of the acquired establishment are divided into three sets. The set consisting of establishments acquired by companies with at least one other establishment in the same 3-digit industry group did not exhibit the decreasing trend shown by the other two sets.

Table E

Year	Percent of acquired establishments acquired by companies having--		
	No establishments in same industry, but at least one in same 3-digit group	No establishments in same 3-digit group, but at least one in same 2-digit major group	All manufacturing establishments in other major groups
1968	8.6	21.7	22.1
1969	11.0	20.8	18.0
1970	10.8	14.8	16.6

As indicated in Table F, among establishments acquired by companies having at least one establishment in the same industry, there was an increase between 1968 and 1970 in the percentage acquired by companies having no establishments in the same geographic division as that of the acquired establishment. However, among establishments acquired by companies whose manufacturing establishments were all classified in other manufacturing industries, there was no such increase. Also, while among companies having at least one establishment in the same industry there was a year to year decrease in the percentage acquired by companies having at least one establishment in the same state, for companies whose manufacturing establishments were all in other manufacturing industries there was a small increase in this percentage.

Table F

Year	Percent of acquired establishments acquired by companies having--					
	At least one establishment in same industry and in--			All manufacturing establishments in other industries and at least one in--		
	Same State	Different State, but same geographic division	Other geographic divisions	Same State	Different State, but same geographic division	Other geographic divisions
1968	71.0	16.1	13.0	57.0	26.1	16.7
1969	68.4	20.3	11.3	56.2	24.4	19.4
1970	65.5	14.7	19.8	60.6	22.6	16.8

Finally, Table G shows that there was a regular and marked increase from 1968 to 1970 in the percentage of acquired establishments acquired by the 9th through the 20th largest companies in the industry of the acquired establishment. It also shows small decreases in the percentages of acquired establishments acquired by the 8 largest companies in the industry and by companies not among the 20 largest in the industry.

Table G

Year	Percent of acquired establishments acquired by--		
	8 largest companies in industry	9th through 20th largest companies in industry	All other companies in industry
1968	6.8	4.3	19.5
1969	6.5	6.7	19.9
1970	6.0	8.8	18.3

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] Data items are zero because establishments engaged in this activity are typically engaged in related activities as well and are classified in other SIC's on that basis.

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols.

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] SIC industries included are only those in which at least one large establishment was acquired during the year. SIC industries in which there were no acquisitions are in tables 1 or 4 depending upon SIC in question.

Table 2b. Number of Large Acquired Manufacturing Establishments and Their Employment in Selected SIC Industries, by Comparison to the Industry Classification of the Acquiring Company's Establishments: 1969

Code	SIC industry classification of acquired establishments[1]	All establishments in industry (a)	All large establishments in industry (b)	All large acquired establishments in industry (c)	Establishments acquired by companies having--

	Employees	60,100	14,791	DD	-	-	-	DD	-	-	-

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than one-tenth of 1 percent. (NA) Not available.
n.e.c. Not elsewhere classified.

[1] SIC industries included are only those in which at least one large establishment was acquired during the year. SIC industries in which there were no acquisitions are in tables 1 or 4 depending upon SIC in question.

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] SIC industries included are only those in which at least one large establishment was acquired during the year. SIC industries in which there were no acquisitions are in tables 1 or 4 depending upon SIC in question.

Table 3a. Number of Large Acquired Manufacturing Establishments and Their Employment in Selected SIC Industries, by Geographic Area of the Acquiring Company: 1968

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] SIC industries included are only those in which at least one large establishment was acquired during the year. SIC industries in which there were no acquisitions are in table 1 or table 4, depending upon SIC in question.

Table 3b. Number of Large Acquired Manufacturing Establishments and Their Employment in Selected SIC Industries, by Geographic Area of the Acquiring Company: 1969—Continued

Code	SIC industry classification of acquired establishments[1]	All establishments in industry	All large establishments in industry	All large acquired establishments in industry	Establishments acquired by companies having manufacturing establishments in--							
					Same industry				Other manufacturing industries			
					Total	Located in--			Total	Located in--		
						Same State	Different State but same geographic division	Other geographic divisions		Same State	Different State but same geographic division	Other geographic divisions
		(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)	(k)
3498	Fabricated pipe and fabricated pipe fittings:											
	Establishments	(NA)	14	2	-	-	-	-	2	1	-	1
	Employees	19,600	4,845	EE	-	-	-	-	EE	DD	-	DD
3499	Fabricated metal products, n.e.c.:											
	Establishments	(NA)	23	4	-	-	-	-	3	1	1	1
	Employees	44,300	11,046	1,712	-	-	-	-	FF	DD	DD	DD
3519	Internal combustion engines, n.e.c.:											
	Establishments	(NA)	41	6	3	1	2	-	3	1	1	1
	Employees	73,400	70,181	HH	GG	FF	GG	-	FF	DD	FF	DD
3522	Farm machinery and equipment:											
	Establishments	(NA)	87	5	2	1	-	1	3	1	1	1
	Employees	126,500	79,437	1,929	EE	DD	-	DD	FF	DD	EE	DD
3531	Construction machinery and equipment:											
	Establishments	(NA)	106	5	4	2	-	2	1	-	1	-
	Employees	138,400	114,467	2,927	FF	FF	-	EE	EE	-	EE	-
3532	Mining machinery and equipment, except oil field machinery and equipment:											
	Establishments	(NA)	19	1	-	-	-	-	1	1	-	-
	Employees	18,400	13,186	EE	-	-	-	-	EE	EE	-	-
3533	Oil field machinery and equipment:											
	Establishments	(NA)	37	1	-	-	-	-	1	-	-	1
	Employees	37,300	25,425	EE	-	-	-	-	EE	-	-	EE
3534	Elevators and moving stairways:											
	Establishments	(NA)	11	2	-	-	-	-	2	2	-	-
	Employees	13,200	7,806	FF	-	-	-	-	FF	FF	-	-
3535	Conveyors and conveying equipment:											
	Establishments	(NA)	25	1	1	1	-	-	-	-	-	-
	Employees	28,200	12,458	DD	DD	DD	-	-	-	-	-	-
3537	Industrial trucks, tractors, trailers, and stackers:											
	Establishments	(NA)	24	1	1	-	1	-	-	-	-	-
	Employees	28,900	20,024	DD	DD	-	DD	-	-	-	-	-
3541	Machine tools, metal cutting types:											
	Establishments	(NA)	7	5	3	3	-	-	1	1	-	-
	Employees	80,600	60,292	2,770	1,731	1,731	-	-	DD	DD	-	-
3542	Machine tools, metal forming types:											
	Establishments	(NA)	29	3	-	-	-	-	2	2	-	-
	Employees	28,300	17,247	1,108	-	-	-	-	EE	EE	-	-
3544	Special dies and tools, die sets, jigs and fixtures:											
	Establishments	(NA)	26	1	-	-	-	-	1	1	-	-
	Employees	112,000	13,939	DD	-	-	-	-	DD	DD	-	-
3545	Machine tool accessories and measuring devices:											
	Establishments	(NA)	47	14	6	4	1	1	7	4	2	1
	Employees	59,800	27,216	9,085	GG	FF	EE	DD	5,962	4,590	EE	EE
3548	Metalworking machinery, except machine tools; and power driven hand tools:											
	Establishments	(NA)	53	6	3	2	-	1	3	3	-	-
	Employees	49,700	35,650	3,102	FF	FF	-	DD	EE	EE	-	-
3551	Food products machinery:											
	Establishments	(NA)	25	2	-	-	-	-	2	1	1	-
	Employees	33,600	13,326	FF	-	-	-	-	FF	EE	EE	-

Table 3b. Number of Large Acquired Manufacturing Establishments and Their Employment in Selected SIC Industries, by Geographic Area of the Acquiring Company: 1969—Continued

Code	SIC industry classification of acquired establishments[1]	All establishments in industry (a)	All large establishments in industry (b)	All large acquired establishments in industry (c)	Establishments acquired by companies having manufacturing establishments in--							
					Same industry				Other manufacturing industries			
					Total (d)	Located in--			Total (h)	Located in--		
						Same State (e)	Different State but same geograpbic division (f)	Other geographic divisions (g)		Same State (i)	Different State but same geographic division (j)	Other geographic divisions (k)
3996	Linoleum, asphalted-felt-base, and other hard surface floor coverings, n.e.c.:											
	Establishments	(NA)	6	2	2	-	-	2	-	-	-	-
	Employees	5,500	5,036	EE	EE	-	-	EE	-	-	-	-
3999	Manufacturing industries, n.e.c.:											
	Establishments	(NA)	34	1	-	-	-	-	1	1	-	-
	Employees	60,100	14,791	DD	-	-	-	-	DD	DD	-	-

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] SIC industries included are only those in which at least one large establishment was acquired during the year. SIC industries in which there were no acquisitions are in Table 1 or Table 4, depending upon SIC in question.

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees	EE - 500 to 999 employees	II - 10,000 to 24,999 employees
BB - 20 to 99 employees	FF - 1,000 to 2,499 employees	JJ - 25,000 to 49,999 employees
CC - 100 to 249 employees	GG - 2,500 to 4,999 employees	KK - 50,000 to 99,999 employees
DD - 250 to 499 employees	HH - 5,000 to 9,999 employees	LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] SIC industries included are only those in which at least one large establishment was acquired during the year. SIC industries in which there were no acquisitions are in tables 1 or 4, depending upon SIC in question.

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(NA) Not available.
(Z) Less than one-tenth of 1 percent.
n.e.c. Not elsewhere classified.

[1] If an SIC industry is not included, no large establishments in this SIC were acquired during the year. However, available data items for the industry can be found in table 1.

Table 4b. Selected Statistics for Large Acquired Manufacturing Establishments in Selected SIC Industries, by the Size Ranking of the Acquiring Company in the Industry: 1969

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees	EE - 500 to 999 employees	II - 10,000 to 24,999 employees
BB - 20 to 99 employees	FF - 1,000 to 2,499 employees	JJ - 25,000 to 49,999 employees
CC - 100 to 249 employees	GG - 2,500 to 4,999 employees	KK - 50,000 to 99,999 employees
DD - 250 to 499 employees	HH - 5,000 to 9,999 employees	LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] If an SIC industry is not included, no large establishments in this SIC were acquired during the year. However, available data items for the industry can be found in table 1.

Note: Detail may not add to totals due to independent rounding. Data for employment are withheld to avoid disclosing figures for individual companies. The employment size range is indicated by one of the following symbols:

AA - Less than 20 employees
BB - 20 to 99 employees
CC - 100 to 249 employees
DD - 250 to 499 employees
EE - 500 to 999 employees
FF - 1,000 to 2,499 employees
GG - 2,500 to 4,999 employees
HH - 5,000 to 9,999 employees
II - 10,000 to 24,999 employees
JJ - 25,000 to 49,999 employees
KK - 50,000 to 99,999 employees
LL - 100,000 employees or more

- Represents zero.
(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than one-tenth of 1 percent.
(NA) Not available.
n.e.c. Not elsewhere classified.

[1] If an SIC industry is not included, no large establishments in this SIC were acquired during the year. However, available data items for the industry can be found in table 1.

APPENDIXES

APPENDIX A
Technical Notes

Part 1. Acquisitions by Large Multi-Unit Companies: 1967 to 1971

Sources and Methods

The data presented in part 1 of this report are a byproduct of information collected during the 1967 Economic Censuses and during the 1971 Pilot Precanvass, which was conducted as a part of preparations for the 1972 Economic Censuses. The 1967 Economic Censuses covered some 4.4 million companies and their domestic establishments. These were companies which had establishments classified in mineral industries, construction, manufacturing, miscellaneous transportation, wholesale trade, retail trade, or selected services.[1] The 1971 Pilot Precanvass was primarily an establishment mailing list updating operation covering all of these companies with a total employment of 2,500 or more in 1967. In addition, a sample of smaller companies was taken for processing technique analysis.

Company-establishment files developed in these two operations were used to identify, through an establishment matching program, acquisitions made by the large Pilot Precanvass companies between the end of 1967 and an undefined time in the second half of 1971.[2] A file listing the 1971 establishments of these companies was matched to the 1967 company-establishment file in order to identify and separate out establishments which were owned by the same companies in both 1971 and 1967. The 1971 establishments which did not match to a 1967 establishment record were broken into two groups according to whether or not the 1971 establishment record included a cross-reference to previous ownership by another census company. Those without such cross-references were provisionally treated as new ("birth") establishments which had come into existence subsequent to the 1967 Census and showed no indications of ownership change. However, due to incomplete recordkeeping in the 1967 Economic Censuses and certain file clean-up operations prior to the 1971 Pilot Precanvass, this group also included some establishments which had changed ownership during the 1968 to 1971 period, as well as some which had existed under the same ownership at least since the end of 1967 (especially establishments newly reported in 1971, which were in industries not within the coverage scope of the 1967 Economic Censuses[3]). Insofar as was possible, all of these "birth" classified establishments were, in time, correctly classified on the basis of research utilizing other Bureau of the Census data files and public information sources as being valid birth establishments, acquisitions, or 1967-owned establishments.

All 1971 establishments which could not be matched to the 1967 establishment listings of the same company, but did have cross-references to pre-1971 ownership by another company, were determined to have changed ownership between the end of 1967 and 1971 and thus classified as acquisitions, either whole-company or partial. In this report, a whole-company acquisition (or merger) is defined as the transfer of more than 50 percent of ownership or control of all operating and administrative establishments of one census company to another. Partial acquisitions are those cases in which only subsidiaries or groups of establishments were sold, or cases where the original company went out of business and its establishments were sold to more than one company. All cases in which single-unit companies were acquired are thus classified as whole-company acquisitions.

It should be noted that the procedure used to identify these 1968 to 1971 acquisitions is to some degree biased in the direction of understating the true amount of merger activity occurring during the period, even barring possible undercounting problems due to incomplete recordkeeping. This is in part because the procedure counts as acquisitions only net changes in ownership, rather than all changes. For example, all establishments which belonged to the same company in 1971 as in 1967 had the same company-establishment identification numbers in both years and thus were not counted as acquisitions, although it is conceivable that some of them might have been owned by another company at some point during the 1968 to 1971 period. Similarly, establishments which were identified as acquired establishments were counted as acquisitions only once, as acquisitions of the company which owned them in 1971, even though they could possibly have changed ownership several times between the end of 1967 and 1971. Also, since establishments had to be in existence at the time of the 1971 Pilot Precanvass in order to be counted as acquisitions, any establishments which changed ownership during the 1968 to 1971 period and ceased operations prior to the end of the period would not have been counted as acquired establishments. Finally, given the number of acquisitions recorded, the identification procedure used may also be biased towards underestimating the number of whole-company acquisitions and overestimating the number of establishments classified as partial acquisitions. This is because a situation in which one company wholly acquired a second company and subsequently divested itself of part of this acquisition to a third company would be counted on a net acquisition basis as two partial acquisitions rather than as one whole-company and one partial acquisition. The reverse situation could also occur, of course, but it would seem less likely than the situation described here.

---

[1] See appendix B for a detailed list of the SIC industries which were within the scope of the 1967 Economic Censuses. Industries not on this list (e.g. in agriculture, finance, or government) are out-of-census-scope industries for the purposes of this report.

[2] No unique establishment affiliation reporting date was specified in the Pilot Precanvass company organization report forms, which were mailed in June, 1971. Each company was simply asked to list each of its establishments, including those under construction or expected to be in operation at any time during 1971, and to return the forms within 20 days.

[3] For the first time in Census operations, the 1971 Pilot Precanvass updated the Census master file to include a listing of all establishments of a Census company, rather than just those specifically within the industrial scope of the Economic Censuses.

Data Items and Tables

The employment data presented in tables 1-5 of part 1 were collected during the 1971 Pilot Precanvass, and for each company or establishment they represent the total number of full- and part-time employees on the payroll during the pay period which included March 12, 1971.[4] Persons on paid sick leave, paid holidays, and paid vacations were all counted, as were salaried officers and executives of corporations, while partners of unincorporated firms were not counted.

In tables 1-3, acquiring companies are distributed vertically on the page by their 1967 enterprise industry categories. Enterprise industry categories are also used as a basis for distributing acquired companies and establishments horizontally across the page in table 3. In the case of an acquiring company in category 52B, for example, acquired companies or establishments also classified in category 52B would be counted as being in the same 3-digit category, while acquisitions classified in categories 52A or 52C would be counted as being in the same 2-digit major group. All acquired companies or establishments classified in other enterprise industry categories, however, would be counted as being in other 2-digit major groups.

In tables 1 and 5, where acquisitions are distributed horizontally across the page according to their acquiring companies' 1967 activities, incomplete records and coding made it impossible to determine whether the 1967 activities of acquired out-of-census-scope establishments were ones in which their acquiring companies were already engaged in 1967 or not. All acquired out-of-scope establishments were classified separately in these two tables, therefore, rather than being counted in the columns for secondary 1967 activities or wholly new activities of the acquiring companies. Within-scope acquired establishments (except for CAO's and auxiliaries or manufacturers' sales branches or sales offices) not acquired by companies classified in the same category were counted in the columns for secondary 1967 activities if the acquiring company in 1967 had at least one establishment in the same category.

Coding

The enterprise industry categories by which acquiring companies are classified in part 1 are 3-digit groupings of 4-digit SIC industries designed to employ the SIC industry classification system used for establishments in constructing a classification system which is conceptually meaningful for consolidated company aggregates of establishment data.[5] The 1967 enterprise industry category classifications of companies in this report are based on the companies' 1967 activities which were within the scope of the 1967 Economic Censuses.

In the case of a single-industry company, its primary enterprise industry category is simply the 3-digit equivalent of the single 4-digit SIC industry in which all of the company's establishments are classified. For multi-industry companies, the primary enterprise industry category is the largest such category within the company's primary industry division,[6] with size and primacy being determined on the basis of establishment payroll data.

In company classification there is a single exception to the rule stated above. In order for a company to be classified in the special category 29A (Integrated petroleum extraction and refining), it must have operating establishments in SIC industries 1312 (Crude petroleum) and 2911 (Petroleum refining), which are in different industry divisions—mining and manufacturing. In addition, the aggregate payroll of its establishments in these two establishment industries must be larger than the corresponding aggregate for any other company industry category. There is no 4-digit establishment SIC industry equivalent to company category 29A due to the category's interdivisional definition which is tailored to recognize the degree of company integration in petroleum extraction and refining.

---

[4] For an extremely small number of establishments which did not report employment data during the 1971 Pilot Precanvass, but which did so during the full 1972 Economic Census Precanvass, the employment data are as of the pay period which included March 12, 1972.

[5] See appendix B for a comprehensive list of 3-digit enterprise industry categories and their SIC industry equivalents.

[6] Either mineral industries, construction, manufacturing, miscellaneous transportation, wholesale trade, retail trade, or selected services. See appendix B.

Part 2. **Acquired Large Manufacturing Establishments: 1968, 1969, and 1970**

Sources and Methods

The data presented in part 2 of this report are a byproduct of information collected during the 1967 Census of Manufactures and the 1968 through 1971 Annual Surveys of Manufactures. The 1967 Census of Manufactures covered approximately 300,000 establishments engaged in manufacturing, while the various Annual Surveys of Manufactures covered approximately 65,000 manufacturing establishments each. These 65,000 establishments in each survey year included all large establishments (defined to be 100 or more employees[1] through the 1969 Annual Survey, and 250 or more employees[2] in later surveys) in manufacturing, as well as some smaller establishments.

Establishments data files developed in these operations were used to identify, through an establishment matching program, manufacturing establishments with 250 or more employees which changed ownership during the years 1968, 1969, or 1970. Acquisitions occurring during any one of these years were identified by matching the previous year's file of large manufacturing establishments to the complete Annual Survey of Manufactures establishment file for the year concerned. Each U.S. manufacturing establishment carries a unique census control number which remains unchanged regardless of ownership changes. This number and company identification numbers (which denote ownership and may therefore change) were used to compare ownership of large manufacturing establishments as of the end of the previous year and the end of the year in question (i.e., control numbers were matched and then company numbers were compared to identify changes in ownership).

Establishments which had changed ownership during the year in question were listed as acquired large manufacturing establishments. Excluded from this acquisition definition are purchases of such intangibles as patents, goodwill, and brand names, or the acquisition of a corporate shell where there is no acquisition of the productive facilities. Also excluded are the purchase of furniture, fixtures, or machinery and equipment, separate from the building, or the purchase or lease of buildings apart from the machinery and equipment.

The procedure used to identify acquisitions of large manufacturing establishments is to some degree biased in the direction of understating the true amount of such activity in any year. This is because it counts as acquisitions only net changes in ownership, and because establishments had to be in existence at the end of two successive years in order to be counted as acquisitions. Establishments owned by the same company at the end of one year as at the end of the previous year were not counted as acquired establishments, for example, though they might have been owned by another company in the interim. Also, establishments which were identified as having changed ownership in any given year were counted as acquisitions for that year only once, as acquisitions of the company owning them at the end of the year, although they could possibly have changed ownership several times during that year. Finally, establishments which began or ceased operations in any given year could not be counted as acquisitions for that year, even though they may have changed ownership during that portion of the year in question during which they were in existence. It should be pointed out, however, that since each of the years 1968, 1969, and 1970 is treated separately, the effect of these biases is not as great as it would be if the entire 36 months under consideration were treated as a single period.

Another case of possible downward bias, in addition to those above, concerns the number of large manufacturing establishments acquired during the specific year 1968. The identification of these acquired establishments was based upon a comparison of files developed from the 1967 Census of Manufactures and the 1968 Annual Survey of Manufactures, whereas in determining acquisitions for 1969 and 1970 only Annual Survey files were involved in the identification process. Because of the greater number of records involved in the 1967 Census of Manufactures than in an Annual Survey of Manufactures and the time required to process them, the possibility exists that the records of some establishments which changed ownership in 1968 were entered into the 1967 Census of Manufactures files under their 1968 company affiliations. To the extent that this occurred, the procedure used to identify acquisitions taking place in any year would credit these ownership changes to the year 1967 rather than to 1968, thus understating the true number of large manufacturing establishments acquired during 1968.

Data Items and Tables

The data presented for the years 1968, 1969, and 1970 in tables 1-4 of part 2 were collected during the Annual Surveys of Manufactures covering those years. The data in most columns of these tables come directly from the establishment data files generated during these surveys. The data in the "All establishments in industry" columns, however, are taken from Annual Survey publications[3] instead and are somewhat less complete. In these publications, for example, data are not available for the individual industries bearing the 4-digit codes 1911, 1999, 3711, 3712, 3729, 3741, and 3742, nor are establishment counts available for any 4-digit industry. Also, available nonfinancial data items are rounded to the nearest hundred, and financial data items are only available at the hundreds of thousands of dollars level.

The employment data appearing in tables 1-4 represent the total number of full- and part-time employees for each operating establishment, including persons on paid sick leave, paid holidays, and paid vacations, as well as officers of corporations, but excluding proprietors and partners of unincorporated firms, members of the Armed Forces, and pensioners carried on the active rolls but not working. For any year the number of employees is the sum of the number of nonproduction workers who worked or received pay for any part of the pay period including March 12, plus an average of the number of production workers who worked or received pay for any part of the pay periods including the 12ths of March, May, August, and November.

---

[1] As of the 1963 Census of Manufactures. In the apparel and printing and publishing industries, at least 250 employees were required.

[2] As of the 1967 Census of Manufactures.

[3] The General Statistics for Industry Groups and Industries volumes of the Annual Surveys of Manufactures for the three years: M68(AS)-1 in the case of the 1968 data, M69(AS)-1 (Revised) in the case of the 1969 data, and M70(AS)-1 in the case of the 1970 data.

The payroll data appearing in table 1 represent for each operating establishment the gross earnings paid during the calendar year in question to all employees on the payroll, whether or not they were employed for the entire year. This includes all forms of compensation such as salaries, wages, commissions, dismissal pay, bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. Salaries of corporation officers are included, while payments to proprietors or partners of unincorporated concerns, members of the Armed Forces, and pensioners carried on active payrolls are excluded.

The shipments data appearing in table 1 and 4 represent for each operating establishment received or receivable net selling values, f.o.b. plant, after discounts and allowances, and excluding freight charges and excise taxes. However, where the products of an industry are customarily delivered by the manufacturing establishments (e.g. bakery products, fluid milk, and soft drinks), the value of shipments is based on the delivered price of the goods rather than the f.o.b. plant price. Included are all items made by or for each establishment from materials owned by it, whether sold, transferred to other plants of the same company, or shipped on consignment. The net selling value of products made in one plant on a contract basis from materials owned by others was reported by the plant providing the materials.

The value added data appearing in table 1 are derived for each operating establishment by subtracting the cost of materials, supplies, containers, fuel, purchased electricity, and contract work from the value of shipments for products manufactured plus receipts for services rendered. This result is then adjusted by the addition of value added by merchandising operations (i.e. the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly) plus the net change in finished goods and work-in-process inventories between the beginning and end of the year in question.

Acquired large manufacturing establishments are distributed vertically on the page in tables 1-4 by their 4-digit SIC industry classification codes, except in some sections of table 1, where 3-digit industry groups are used instead. Four-digit industries and 3-digit industry groups are also used, along with 2-digit major groups, as a basis for distributing acquired establishments horizontally across the page in table 2.

In table 3, acquired establishments were horizontally classified in the "Same industry" category if the acquiring company had one or more establishments in the same 4-digit SIC industry in the prior year and in the "Other manufacturing industries" category if the acquiring company had manufacturing establishments only in other 4-digit SIC industries. Within each of these categories the criterion of one or more prior year establishments was also used in classifying the acquired establishments geographically.

Coding

The 4-digit SIC industries by which acquired establishments are classified in part 2 are as defined in the 1967 **Standard Industrial Classification Manual** published by the Office of Management and Budget, Executive Office of the President. The SIC system of classifying establishments according to the type of activity in which they are engaged facilitates the collection, tabulation, presentation, and anlysis of economic data relating to establishments.

The SIC structure covers the entire field of economic activities and makes it possible to classify establishments within each industry division on a 2-digit, 3-digit, or 4-digit basis, according to the degree of detail desired. A manufacturing division establishment making cough medicines, for example, would be classified, in order of increasing detail, in 2-digit major goup 28 (Chemicals and allied products), 3-digit group 283 (Drugs), and 4-digit industry 2834 (Pharmaceutical preparations).

The SIC industry code for any particular establishment is generally derived by summing the value of shipments of each 7-digit product class to its 4-digit SIC industry equivalent and assigning the 4-digit code representing the greatest portion of the establishment's shipments.

APPENDIX B. Code Reference List of Enterprise Industry Categories Used in Tables 1-3, Part 1, and Their 1967 Census (SIC) Establishment Industry Equivalents

Tables 1-3, part 1, enterprise industry categories		1967 census (SIC) establishment industry equivalents	
Code	Title	Code	Title
	MINERAL INDUSTRIES		
10A	Metal mining	10	Metal mining
12A	Coal mining	11	Anthracite mining

n.e.c. Not elsewhere classified. X Not applicable. pt. Partial.

[1] Census industries 1312, "Crude petroleum", and 1313, "Natural gas", combined are equivalent to SIC industry 1311, "Crude petroleum and natural gas".

[2] Companies primarily engaged in both the extraction and refining of petroleum (Census industries 1312, "Crude petroleum", and 2911, "Petroleum refining") were classified in enterprise industry category 29A, "Integrated petroleum extraction and refining", for purposes of this report. Category 29A, therefore, is a classification that applies only to company data in this publication and not to the establishment data appearing in this or in the regular economic census volumes.

n.e.c. Not elsewhere classified.

APPENDIX D
Terms and Concepts

Establishment: An establishment, for census purposes, is a business or industrial unit at a single physical location which produces or distributes goods, or performs services. When more than one company conducts operations at a single location, each business under separate ownership is regarded as a separate establishment. Also, if a company engages in several distinctly different kinds of economic activity at one location, each kind is treated as a separate establishment if the separate activities are economically significant in size and if separate records are available.

Central Administrative Offices and Auxiliaries: A central administrative office (CAO) is an establishment whose employees are primarily engaged in general administrative, supervisory, purchasing, accounting, general engineering and systems planning, legal, financial, and related management functions performed centrally for other establishments of the same company. An auxiliary is an establishment whose employees are primarily engaged in performing supporting services, such as warehousing or research and development, for other establishments of the same company, rather than for the general public or for other business firms.

Operating Establishment: An operating establishment is any establishment which is not a central administrative office or an auxiliary establishment.

Manufacturers' Sales Branches or Sales Offices: A manufacturers' sales branch or sales office is a wholesale trade establishment which primarily distributes products manufactured by its owning company.

Company: A company, for census purposes, is a business organization consisting of one or more establishments under common ownership or control. If a company owns or controls other companies, all establishments of its subsidiary companies are also included as part of the owning or controlling company.

Single-Unit Company: A company consisting of only one establishment.

Multi-Unit Company: A company consisting of more than one establishment.

Geographic Division: A geograhpic division consists of a number of contiguous States grouped together for the purpose of providing summary statistics at an intermediate level between those for the United States as a whole and those for individual States. The nine such divisions for census purposes consist of the New England States, the Middle Atlantic States, the South Atlantic States, the East South Central States, the West South Central States, the East North Central States, the West North Central States, the Mountain States, and the Pacific States.
